

Sohonet ClearView HD

Sohonet ClearView is a fully-managed remote collaboration solution for high-quality, real-time color grading, editing, digital intermediates and approvals. ClearView includes hardware and private network bandwidth without the CAPEX – or any of the hassle. With ClearView, there's no need to fly across the world for an editing session.

Regardless of physical distance, you'll get real-time feedback during editing sessions, even when the director or cinematographer is sitting 5,000 miles apart from the executive on the project. ClearView can support 2K, 2K 3D or 4K workflows plus video conferencing in real-time, so reactions are timely and relevant to the content on the screen.

Sohonet is the expert in supporting high-quality content creation workflows, and ClearView was designed specifically with the media and entertainment industry in mind. This innovative technology offers extremely low latency and extremely high quality and allows these demanding workflows to function between continents as if everyone were working in the same room together.

Sohonet ClearView offers private, dedicated connectivity to ensure that network bandwidth requirements are met. Our flexible pricing models allow for short-term production projects, as well as long-term service needs. Additionally, Sohonet provides full service and 24/7 support including remote monitoring and managing of the network for a comprehensive solution that takes the technical burden away from you.

When close collaboration on a project is required, but traveling across the world for an editing and color-grading session isn't feasible, ClearView is the next best thing to being there.

FEATURES

- Share high-quality, color-true images over any distance, combined with world-class video conferencing so you can work as if in the same room
- Each user has 2 50-inch screens – 1 for the shared content and the other for video conferencing.
- Extremely low latency allows for 2K workflows good enough for projection
- Private dedicated bandwidth is provided as part of the service to ensure network is matched to requirement
- Flexible pricing model allowing for short-term production projects as well as long-term service needs
- Fully managed service with 24/7 support
- Standard I/O for maximum compatibility with existing local suites
- Remote monitoring and management of the devices & the network ensure a speedy resolution to any problems.
